

Learn about new features that speed up your day, like the addition of more context menus accessible by a right mouse button click. Materialise Magics itself is faster with some functions utilizing multiple cores with more functions to come in later versions. Use the new Interactive Translate and Rotate functions to quickly/easily position parts to precise locations with a click and drag. Discover these features and more during our Materialise Magics training sessions.

Basic

Getting started with Magics: visualization, measuring, settings, part placement, fixing

Advanced
